

CASE HISTORY:- New Scout Hut for Daventry Second Scouts.

CONTRACTOR	Pauley Construction Ltd
ARCHITECTS	G4 Design
DESIGN & SUPPLY	Hy-Ten Gabion Solutions

A new scout hut with modern facilities is being constructed within Daventry Country Park. The building has a gabion cladding up to a height of 2 metres which runs around the whole of the building with only the main entrance and service door areas left open.

The gabions are trapezoidal units and an unusual feature is that the corners are also mitred to maintain the shape. The units are filled with local ironstone and in some areas planting into the gabion faces will be added after construction is complete.

Hy-Ten supplied gabion units in triple life coated welded mesh 76.2mm x 76.2mm x 4mm diameter. The joints are laced in accordance with the architects design.

If you would like Hy-Ten to design and supply gabions and land reinforcement products for you, please contact Steve Lisle or Greer Charlton on **01902 712200**.
