

CASE HISTORY:- Daventry Working Mens Club.

CONTRACTOR	John Sisk & Son Ltd.
GABION CONTRACTOR	Greenhill Construction UK Ltd.
DESIGN & SUPPLY	Hy-Ten Gabion Solutions.

The new working men's club in Daventry is being built on the site of the original club building which had one elevation clad in local stone. In order to replicate this stone facing on the new building, it was decided to incorporate a gabion cladding to 3 elevations and to add gabion piers elsewhere.

Hy-Ten designed and manufactured the gabion cladding units using 76.2mm x 76.2mm x 5mm diameter triple life coated (95% zinc 5% aluminium) welded mesh with all joints laced.

The stone infill is locally sourced Ironstone which gives a very striking appearance to the project.

If you would like Hy-Ten to design and supply gabions and land reinforcement products for you, please contact Steve Lisle or Greer Charlton on **01902 712200**.
