

CASE HISTORY :- Cokenach Estates

CONTRACTOR	Smallwood Gabion Contractors
CONSTRUCTION	April 2006
GABION WALL DESIGN	HY-TEN GABION SOLUTIONS

Following the failure of the existing moat embankment, Hy-Ten were requested by the contractor to prepare a Gabion Wall design for reinstatement.

The gabion wall was designed with a flush face using the Hy-Ten gabion 700 system to ensure a superior quality of construction.

The gabions were filled with granular site fill behind a facing of reclaimed bricks which were from the original wall.
