

CASE HISTORY:- Newton Abbot Hospital.

CONTRACTOR	Rydon Construction Limited
GABION CONTRACTOR	Greenhill Construction Limited
DESIGN & SUPPLY	HY-TEN Gabion Solutions

Hy-Ten Gabion Solutions has designed, manufactured and supplied the gabion cladding for the new Hospital in Newton Abbot in Devon.

The project required gabion cladding fixed to the main elevations.

The gabions were filled by hand with locally quarried limestone to give an aesthetically pleasing appearance whilst utilising material sourced as locally as possible..

The units' rear, side, top & bottom panels are made from 76.2mm x 76.2mm x 4mm triple life coated welded mesh and the front / face panels are the same but of 5mm thick wire.

The gabion units are fixed to the blockwork with heavily galvanised steel clamp bars and anchors.

If you would like Hy-Ten to design and supply gabions and land reinforcement products for you, please contact Steve Lisle or Greer Charlton on **01902 712200**.
